Piyush Malviya – AR-VR Engineer / Software Engineer

: +91-8962775590 | : malviyapiyush35@gmail.com | Indore | LinkedIn

Outline

Innovative Unity 3D Developer with over 2.5 years of experience specializing in immersive 3D games and interactive event-tech installations. Proficient in writing scalable C# scripts, implementing physics-based systems, and optimizing performance for PC, Android, and WebGL. Hands-on expertise in AR/VR development, gesture-based interactions, and seamless VFX/SFX integration. Passionate about creating sensor-driven experiences that push the boundaries of real-time rendering and user engagement.

KEY SKILLS

Unity | C# | XR Development | AWS Cloud | Game Development

TOOLS & TECHNOLOGIES

Scripting Languages: C#, Basic Python| **Container Platform:** Docker | **Version Control:** Git, GitHub | **DevOps Tools:** AWS Cloud, Terraform, Linux, Docker | **Platforms:** Mobile, VR, AR, MR, WebGL | **Unity Engine:** Unity 2D/3D, Animation System, Particle Systems | **XR Technologies:** AR Foundation, Vuforia, Meta XR Development Toolkit SDK, DPVR SDK **| Programming Tool:** Visual Studio, Visual Studio Code

PROFESSIONAL EXPERIENCE

ARVR Engineer/Software Engineer | STEMROBO Technologies Private Limited	Noida, IN| Sept 2024 – February 2026
Unity Developer Intern | ZGen Studio	Noida, IN| April 2024 – July 2024
Jr. Unity Developer | Abhiwan Technologies Private Limited	Noida, IN| July 2023 – Dec 2023

Key Project Goal 1

- **Designed and developed interactive VR content** using **Unity3D** and **C#** for educational and simulation-based immersive applications, improving learning engagement.
- **Built Augmented Reality solutions** leveraging **Unity and AR SDKs** for **marker-based and marker-less AR experiences on mobile platforms.**
- **Collaborated cross-functionally** with designers, educators and content developers to transform concepts into **interactive learning modules** and polished deliverables.
- **Optimized device performance,** improving application stability, load times and runtime efficiency.

Key Project Goal 2

- **Developed 2D & 3D game features** using **Unity Engine and C#**
- **Integrated UI elements and UI animations for gameplay menus and interfaces**
- **Built core game systems** including **shop system, save system** and **level design** logic
- **Created and deployed games** for **Android, Windows and WebGL** targets.
- **Collaborated with team members** to deliver polished casual games on multiple platforms.
- **Managed and refined multiplayer game functionality within project workflows.**

KEY PROJECTS EXECUTED

1. **Project:** AWS Multi-Environment Infrastructure Automation (Terraform)

Key Achievement:

- **Architected modular AWS infrastructure automation using Terraform (IAC) to deploy EC2, S3, DynamoDB across Dev, Staging & Prod environments, improving consistency and reusability.**
- Reduced code duplication by 70% by implementing reusable Terraform modules, implemented dynamic scaling and **automated Nginx server provisioning via shell scripts.**

2. **Project:** Automated Cloud Integrated Backup Utility

Key Achievement: Engineered an automated, hybrid-cloud backup solution to ensure 100% data durability and disaster recovery readiness.

- **Automation Efficiency:** Reduced manual backup efforts by 95% by developing a Flask-based portal.
- **Storage optimization:** Implemented a data retention logic using Python's OS and time modules, reducing storage costs by **30%** through the automated cleanup of archives older than **7 days.**
- **Monitoring & Reliability:** Improved system observability by integrating a Python logging framework, resulting in a **40% faster troubleshooting rate** for failed backup.
- **Multi-Destination Redundancy:** Achieved **99.99% data availability** by architecting a "dual-mode" backup pipeline that simultaneously targets local physical storage and **AWS S3**.

EDUCATION

- **Masters of Computer Application** | Birla Institute of technology, Noida|2023| 7.86 CGPA
- **Bachelors of Computer Application** | Govt. Nirbhay Singh Patel Science College, Indore|2020| 68.54 %
